

MATH 141 Calculus 2
Fall 2015
Final Exam Statistics and Script-Viewing

td;lr: email me asap if you need anything; please allow 24 hours for a response. I may be out of town often.

Your letter grades are now up on Minerva, and your scores on the final exam are now up on MyCourses. The final exam scores were curved a little; below are the statistics before curving. (The scores on MyCourses are also before curving.)

Mean: 66.8 out of 100.

Median: 70 out of 100. i.e. half the class scored 70 points or above.

75th percentile: 82 out of 100. i.e. a quarter of the class scored 82 points or above.

25th percentile: 57 out of 100. i.e. a quarter of the class scored 57 points or below.

10th percentile: 39 out of 100. i.e. a tenth of the class scored 39 points or below.

If you would like to look at your graded final, please email me (cy.amy.pang@mcgill.ca, or, if you hear no response in 24 hours, amypang@lacim.ca) **by December 31 at the latest**. A few days afterwards, I will ask you for your availability, and then schedule an official exam viewing time (most probably January 7 or 11). You can then drop in any time during the official viewing time, and I'll be happy to go over your final with you.

The official exam viewing time and location will only be announced to students who contacted me. **There may be last-minute changes**, please keep a close eye on your email.

I won't have all 350 papers at the viewing, only the papers of students who contacted me in advance. If you contact me after December 31, I will do my best to let you see your exam, but no promises. The finals are stored in the department office once they're graded, so I can't let you see your paper outside of an official exam viewing time.

I have moved out of my office in McGill now, and will probably be out of town, many time-zones away, for a fair amount in the winter semester. So if you wish to contact me for any reason, it's best to email.
